Brad® applicomIO Ethernet/IP network interface cards provide powerful and reliable data acquisition for PC-based control and visualization applications.

Some of the world's most demanding high-speed control and automation applications run on standard PCs using Brad applicomIO fieldbus interface cards. Dedicated DCS and PLC systems have been eliminated in favor of open platforms running PC-based control systems.

Brad applicomIO products have been designed for industrial applications independently of the fieldbus used. OEMs, system integrators and end-users can take advantage of developing standard control applications as well as selecting the fieldbus connectivity required from the Brad applicomIO product range.

Brad applicomIO products consist of a fieldbus card and engineering tools which quickly and easily setup communication. Everything is included for a successful implementation at a lower cost.

Brad applicomIO network interface cards provide connectivity support for all popular fieldbuses including EtherNet/IP, PROFINET IO, Modbus TCP, PROFIBUS, DeviceNet and CANopen. Our cards are developed in compliance with the technical specifications of industrial organizations and comply with the applicable industrial standards.

Brad applicomIO supports up to 8 cards in a single PC and can run on various operating systems including Windows 32-bits, Linux as well as real-time OS such as VxWorks, QNX, and VenturCom RTX.

Particularly, the Brad applicomIO network interface card provides high-speed deterministic communication to exchange data with industrial devices through EtherNet/IP messaging. The built-in processor handles all the protocol management to offer reliable and outstanding performance.

The software package includes a common development library for all fieldbuses supported. The process data is exchanged with the control application through a shared memory where inputs/outputs are automatically mapped. To monitor the communication between the card and the control application, the library includes a watchdog feature to automatically detect software blocking.

A real Turnkey Solution

Brad applicomIO configuration software console provides a standardized and user-friendly environment for quick development of communication applications without the worry of knowing industrial communication protocols. The console saves time during the commissioning phase by offering features such as automatic device detection, user configuration management, diagnostic information, etc.

Product package includes:
- Network interface card
- Engineering console for configuration and diagnostics
- Data Servers (OPC DA v3.0 & v2.05, Wonderware DAServer and FastDDE/SuiteLink)
- Development Libraries: Windows (DLL), VenturCom (RTX)
- Static library for non-windows OS (VxWorks, QNX, Linux, etc)

FEATURES AND BENEFITS

- Support of Windows 32-bit and 64-bit (WoW64)
- Support of Windows Seven and 2008 Server
- Support of PCI Express 1x form factor
- Protocols:
  - EtherNet/IP Master/Scanner
  - EtherNet/IP Adapter
- Reliable solution based on embedded protocol technology for powerful data throughput
- Single-time development of API for whatever fieldbus used
- “User-friendly” engineering tools for configuration and diagnostics
- Remote connection through Ethernet port (for embedded system platform)
- Application watchdog
- Automatic I/O mapping for easy configuration
- I/O exchange up to 14 Kbytes

SUPPORTED OS

Standard package
- Windows 32-bit and 64-bit (WoW64)
  - Windows XP
  - Windows 2003 Server
  - Windows Vista
  - Windows Seven
  - Windows 2008 Server
  - Windows 2008 Server R2

TYPICAL APPLICATIONS

- PC-Based Control
- Robotic application
- Panel PC visualization system

SPECIFICATIONS

Technical Data
- Bus interface:
  - PCI rev 2.2, 32-bit, 33 MHz, PCI Universal 3.3V/5V keying, PCI-X compatible PCI Express 1x
- Processor: AMD SC520 - 133 MHz
- Memory: SDRAM: 16 Mbytes, Flash: 4 Mbytes
- Interruption: Hardware Plug&Play
- DPRAM Address: Hardware Plug&Play (32 Kbytes used per card)
- Dimensions (L x W):
  - 168mm x 107mm (6.61" x 4.21")
- Consumption: 5.5 W
- Operating Temperature:
  - 0°C (32°F) up to +65°C (149°F)
- Storage Temperature:
  - -40°C (-40°F) up to +85°C (185°F)
- Discrete Input: 1x Opto-coupled
- Discrete Output: 1x "WatchDog" (dry contact)
- EMC Compliance:
  - N55022 Class B, EN61000-6-2, EN61000-3-2, EN61000-3-3
- RoHS Compliance: YES

Communication Port
- Port type:
  - Ethernet port IEEE 802.3 for industrial applications
- Connector type: BaseT (RJ45)
- Speed: 10/100 Mbps (Auto-negotiation)
- LED indicators: 4 LEDs - TX, RX, Link, 100 Mbps
- Remote Access: Also usable for remote and diagnostic configuration

Protocol
- EtherNet/IP - Explicit Msg and Implicit Msg (I/O Control)
- I/O Master/Scanner and Slave according to EtherNet/IP specifications
- Up to 128 simultaneous CIP based connections
- EtherNet/IP Devices supported: Rockwell I/O (FlexIO, CompactLogix, etc.) through EDS files.
- IP address settings configurable via the console or DHCP/BOOTP server
- Client DNS Supported
- ODVA Conformance Tested

SOFTWARE TOOLS

Brad® applicomIO software tools enable fast integration of the fieldbus into your control application. Independently from the fieldbus used, the console remains the same.
