Molex Manual Wire Stripper Tool

Provide production flexibility while reducing overall tooling costs

The Manual Wire Stripper by Molex is a self-adjusting tool that provides the widest stripping capacity of any tool of its type in the industry. In addition, features such as stripping cassette options that allow stripping for multiple wire sizes as well as a built-in wire cutter provide production flexibility and reduce overall tooling investments. Combined with its lightweight and ergonomic design, the Manual Wire Stripper is qualified for high volume production and portable field usage.

The Manual Wire Stripper is designed for conduit wires, flex power cables, equipment wires and flat phone cables between 0.05 to 10.00mm diameter and insulation thicknesses of up to 1.00mm.
